1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 1-16, 21-23 and 35-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Calhoun (5,141,790).

Calhoun relates to an adhesive article comprising an adhesive layer (60) and release liner (76) wherein the liner has a first surface associated with the adhesive layer and provided with outwardly extending protrusions that penetrates the adhesive layer. As shown in figure - 7, the outwardly extending protrusions is taken to be the area of the liner located between the embossed depressions. Similarly, said protrusions penetrate the adhesive layer in the areas between the elements (75) of the adhesive layer.

Since, the release layer is embossed on both surfaces, it will also function as a backing layer when the article is in a rolled form. The backing material can be polymeric film, paper, etc. Also, as shown in figure - 7, the adhesive does not contact the land or the depressed area (around the protrusion) of the release liner. The protrusions can have any shape.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1772

5. Claims 1-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Calhoun.

Calhoun, as discussed above, fails to teach that the posts have circular cross-section shape, particular diameter, density, aspect ratio, height, etc. It would have been an obvious matter of design choice to modify Calhoun by providing circular-shaped protrusions as it involves a mere change in the shape of the product.

Further, the claimed dimensions of diameter, density, aspect ratio, height, etc. would have been obvious based on optimization through routine experimentation.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 703-308-4424. The examiner can normally be reached on Monday-Thursday from 7:30 am to 5 pm. The examiner can also be reached on alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251.
